

## Odbcng - Bug #4858

### Modify make install for the headers

02/22/2006 12:48 PM - bford -

<b>Status:</b>	Closed	<b>Start date:</b>	
<b>Priority:</b>	High	<b>Due date:</b>	
<b>Assignee:</b>	bford -	<b>% Done:</b>	0%
<b>Category:</b>		<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	ODBCng 1.0		
<b>Resolution:</b>	fixed		

#### Description

Currently if you perform a make install it will install into /usr/local/include/Src which almost never exists.

Instead make install should:

1. `mkdir -p /usr/local/include/odbcng`
1. install all headers into /usr/local/include/odbcng

#### History

##### #1 - 02/23/2006 08:56 AM - anonymous -

we can do it, but does it make sence ?

all ODBC applications works with standart ODBC-headers, all our \*.h are iternal, not for 3rd part programs.

##### #2 - 02/23/2006 09:11 AM - anonymous -

since there is no need to install headers, they removed from make install process in r21

##### #3 - 02/24/2006 10:30 AM - anonymous -

- Status changed from New to Closed

- Resolution set to fixed
