**Description**

Add the ability to graph a specific block of time.

IE I'd like to see the 10 minute graph from 2 weeks ago, so that I can inspect Foo. and corilate it with information provided by a customer.

**History**

**#1 - 10/16/2007 09:38 AM - Aurynn Shaw**

I think I'd like to punt this one until we have the new SVG/JS version of PGGraph running.

**#2 - 10/16/2007 10:23 AM - Darcy Buskermolen**

I'd think the internal mechanics would we the same.  IE a starting time and interval.  Granted there might need to be a bit of HTML magic that's needed to get at this convient to a user, but in the interm i think that URL munging would be a viable alternitive...

**#3 - 10/16/2007 10:28 AM - Aurynn Shaw**

I'd need to rebuild the functions to use the offset, but yes, it can be done fairly easily. Requires a little magic internally to support it, but overall it's not terribly complex.
