<b>Target version:</b>	Release 1.4		
<b>Resolution:</b>			
<b>Description</b>			
There is pl/php definition as attached plsimple.sql. Which include other files blank.php.			
Run first time:			
<pre>test=# select plsimple();  plsimple ----- (1 row)</pre>			
test=#			
Run second time:			
<pre>test=# select plsimple();  plsimple ----- Hello world! (1 row)</pre>			
When remove the definition of function test() in the blank.php, the issue disappears.			

#### History

##### #1 - 11/02/2011 11:19 PM - anthony chen

- File blank.php added: <https://public.commandprompt.com/attachments/203/blank.php>

##### #2 - 11/03/2011 04:31 AM - anthony chen

To be sure that blank.php need to be owned by postgres,  
or else will failed to run.

##### #3 - 11/04/2011 08:57 AM - anthony chen

This issue is closed at <https://github.com/commandprompt/PL-php> latest checkout version.

Sorry to report incorrect issues.
