

pitertools - Bug #5314

cmd_standby with start parameter doesn't work

05/14/2015 03:43 PM - Michael Vitale

Status:	Closed	Start date:	05/14/2015
Priority:	Normal	Due date:	
Assignee:	Eric Worden	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Resolution:	fixed		

Description

If you try to run cmd_standby like this, you will see the problem.

```
$PITRTOOLS/bin/cmd_standby -C /home/postgres/pitertools-1.3/etc/cmd_standby.ini -A start
```

code snippet with fix where I comment out self.copy_conf() since self is not within scope in the main body entry point.

```
1. If we want to start or stop postgresql on the slave
   elif pgctl_action == 'start': ### mjb fix ### self.copy_conf()
   success = standby.copy_conf()
```

History

#1 - 10/22/2015 11:01 AM - Eric Worden

- Status changed from New to Closed
- Assignee changed from Michael Vitale to Eric Worden
- Resolution set to fixed

This issue affects the version referenced in the tarball linked in wiki, but not in the current master branch.
