

postgresql-snap - Task #5319

Build packages with PGDG compiler flags

10/28/2016 06:28 AM - Ivan Lezhnjov

Status:	Resolved	Start date:	10/28/2016
Priority:	Normal	Due date:	
Assignee:		% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour

Description

There's no way to specify compiler flags that are normally provided to the autotools' ./configure script via shell variables.

PGDG builds use the following flags:

```
-Xsepgsql  
-fPIC -pie  
-I/usr/include/mit-krb5  
-Wl,--as-needed -L/usr/lib/mit-krb5 -L/usr/lib/i386/mit-krb5
```

that ideally we should incorporate in snap packages as well.

History

#1 - 01/27/2017 01:03 AM - Ivan Lezhnjov

- Status changed from New to Resolved

- % Done changed from 0 to 100

This was resolved by using build: scriptlet.
