

postgresql-snap - Task #5320

Build —with-gssapi

10/28/2016 06:31 AM - Ivan Lezhnjov

Status:	Resolved	Start date:	10/28/2016
Priority:	Normal	Due date:	
Assignee:		% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
Enabling —with-gssapi results in fatal error “could not find function 'gss_init_sec_context' required for GSSAPI”.			
This may be connected to missing compiler flags.			

History

- Status changed from New to Resolved

- % Done changed from 0 to 100

The build: scriptlet used to address [#5319](#) automatically resolves this issue by way of simply setting up correct Kerberos library paths.

This has been resolved and updated packages published on Ubuntu Store.
