

postgresql-snap - Bug #5329

Build core and contrib as a single part

01/26/2017 07:21 AM - Ivan Lezhnjov

Status:	Resolved	Start date:	01/26/2017
Priority:	Normal	Due date:	01/26/2017
Assignee:	Ivan Lezhnjov	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
<b>Description</b>			
It was pointed out by a snapcraft developer that parts are not expected to be related and the workaround we use is not guaranteed to work.			
Instead, we can use build: and install: scriptlets to build core and contrib as a single part.			

History

#1 - 01/27/2017 01:02 AM - Ivan Lezhnjov

- Status changed from New to Resolved
- % Done changed from 0 to 100

This was a success. Changes published on github, new package versions uploaded to Ubuntu Store.
